

Job Title: Senior Structural and Architectural Steel Estimator

Location: Wickford, Essex

Company: Assesmont Group Ltd

Salary: £60,000 - £75,000 depending on experience

About Us:

At Assesmont Group Ltd, we pride ourselves on delivering top-tier steel solutions for the construction industry. Our projects range from commercial skyscrapers to intricate residential structures and a wider range of sectors. We are seeking an experienced and highly skilled Senior Structural and Architectural Steel Estimator to join our team and lead our estimating department.

Job Description:

As a Senior Structural and Architectural Steel Estimator, you will be at the forefront of our project planning and cost estimation processes. Your extensive experience and expertise will be crucial in ensuring the accuracy and efficiency of our estimates, contributing to the successful execution of our projects.

Key Responsibilities:

- Ensure that all quotes are logged and distributed to the different team members based on their experience and work load.
- Update senior management as to deadlines of incoming quotes to ensure all incoming works are quoted and distributed back to clients on time and within their return periods.
- Mentor and provide guidance to junior estimators, fostering a culture of continuous improvement and professional development.
- Lead the estimation process for structural and architectural steel projects, from initial concept through to final bid submission.
- Analyse project specifications, blueprints, and drawings to determine the scope of work and required materials.
- Prepare comprehensive and detailed cost estimates, including labour, materials, and equipment.
- Collaborate closely with project managers, engineers, architects, and clients to gather necessary information and ensure alignment on project requirements.

- Identify and evaluate potential cost-saving opportunities and value engineering options.
- Oversee the preparation and submission of bid proposals, ensuring accuracy and competitiveness.
- Stay updated on industry trends, material costs, and advancements in steel fabrication and construction techniques.
- Assist in contract negotiations and procurement of materials.
- Monitor project progress and adjust estimates as necessary to reflect changes in scope or conditions.

Qualifications:

- Minimum of 10 years of experience as a steel estimator in the Architectural and Structural Steel industry.
- In-depth knowledge of steel components, fabrication processes, and construction methodologies.
- Proficiency in estimating software and tools (e.g., Bluebeam, AutoCAD, MS Excel).
- Exceptional analytical and mathematical skills.
- Strong attention to detail and accuracy.
- Excellent communication and interpersonal skills.
- Proven ability to lead and mentor a team.
- Ability to work independently and collaboratively in a fast-paced environment.

Benefits:

- Competitive salary.
- Company pension scheme.
- Opportunities for professional development and career advancement.

How to Apply:

Interested candidates are invited to submit their resume and a cover letter detailing their relevant experience to Joe@assesmont.co.uk. Please include "Senior Structural and Architectural Steel Estimator Application" in the subject line.
